Luis Sanchez

Senior Software Engineer | heyluis@duck.com | +46 73 367 6640 | Stockholm, Sweden | luisanz.com

Senior Software Engineer with over 9 years of experience building scalable, resilient backend systems using modern, proven technologies. I've led greenfield projects and improved existing applications to meet evolving user and business needs. I thrive in collaborative environments and value clear communication, shared goals, and continuous learning. While my expertise lies in backend development, I'm not afraid to dive into frontend work.

PROFESSIONAL EXPERIENCE

Senior Software Engineer — Volvo Cars — Jul '23 - Present

- Led the design and implementation of the communication service for vehicle service reminders
- Contributed in the implementation of vehicle service recommendations using event driven architecture
- Collaborated and coordinated implementation of communication service across several teams

Senior Software Engineer — Airmee — Mar '21 - Jul '23

- Led the design and implementation of the amazon.se integration, resulting in the processing of ~50% of all company orders
- Redesigned the integration for a large retailer, improving scalability and reducing processing timeouts by 70%
- Increased address geocoding accuracy by 60% by implementing a dynamic fallback geocoding service
- Implemented a shared library, reducing repeated code by 40% and improving code maintainability
- Improved debugging efficiency in production by adding a logger with different levels for granular issue tracking
- Increased test coverage by 30%, as well as test quality by adding test to critical functions of integration services

Software Engineer — Vivial — May '18 - Mar '21

- Successfully migrated customer profiles to a new platform, improving data accessibility and security
- Created new API services to allow customers to track their online visibility, resulting in improved customer engagement and satisfaction.
- Improved endpoint security by implementing authorization measures based on user access policies, increasing data protection and compliance.

Software Developer Jr — Vivial — Sep '15 - May '18

- Fixed bugs on the data parser application, reducing errors by 50% and improving data accuracy.
- Redesigned the desktop parser app to reduce UI blocking operations and improve user experience.
- Fixed bugs on the payment system web app, improving payment response time by 30% and streamlining the payment process.

SKILLS & EDUCATION

Proficient with

NodeJs, PostgreSQL, Typescript, GraphQL, Kafka, ElasticSearch, AWS, Azure, Kubernetes, C#, Git, Github, SQL, CircleCI, Bitbucket Pipelines, React

Master's degree, E-Commerce/Electronic Commerce (2020) - APEC University

Bachelor of Systems Engineering (2015) - APEC University
